

Little Giant  
Compact Commercial  
Cleaning Systems

# A Compact System Delivering a Powerful Punch

## Compact Performance

The Little Giant is a high performance, small footprint commercial cleaning system with multiple disinfection programs. Combining a stainless steel exterior with durable, rugged components, this system is built for demanding day in, day out use and cleans with the ability and finesse you expect from Miele Professional.

The Little Giant washer and dryer combination are the perfect solution when floor space is at a minimum, but performance cannot be sacrificed. The height of the system makes it ideal for under counter locations, providing you design and installation flexibility.

## Easily Stackable

For added convenience, the washer and dryer can be easily stacked for placement in master or guest suites, pantries, or storage rooms. Other added benefits for easy installation include a drain pump, eliminating the need for a floor drain, and very low machine noise and vibration, even during the washer's impressive 526 G-force, 1400 rpm extraction spin.

## High Temperature Disinfection

The Little Giant is the only commercial laundry system of its size to have the ability to reach and hold high temperatures to achieve thermal disinfection. This commercial washer features four temperature hold cleaning programs, including:

- 185°F held for 15 minutes (*High Temp Disinfection*)
- 158°F held for 10 minutes
- 140°F held for 20 minutes
- 104°F held for 30 minutes

## THE LITTLE GIANT AT A GLANCE

*Water temps in excess of 200° F to melt oils and residue from fabrics; effectively holds high temperatures to achieve disinfection.*

*Residual moisture controlled dryers for safer, more energy efficient drying.*

*Honeycomb Drum™ provides superior garment care - garments last 4x longer.*

*Specialty wash programs including silk and wool in 21 languages.*

*Highest extraction available - significantly reduces drying time and energy costs.*

*Large lint filter accommodates up to 16 drying cycles without cleaning.*

*Main bearing designed for 25,000 operating hours (At 30 hours per week this translates into 16 years of operation.)*

*Small footprint. Easily fits undercounter or stacked for closet placement.*

*Built to run load after load, all day long unlike residential machines which are built for a few loads per day.*

# Environmentally Friendly Compact Space-Saver and Energy Efficient

## Recyclable

90% of a Miele Little Giant is recyclable. Made of high grade 304/316 stainless steel for years of rust free use.

## Designed to last and last

Main bearing is designed for 25,000 operating hours. At 30 hours per week, this translates into 16 years of operation. Most Miele professional washers far exceed this lifespan.

## Super Large Dryer Filter

Accommodates up to 16 loads without cleaning the dryer filter. This ensures longevity of the dryer.

## Compact Design

The washer and dryer can be easily stacked for placement in residential laundry rooms, master or guest suites, pantries or storage rooms.

## Patented Drum Design

Miele's unique Honeycomb Drum™ provides superior garment care - extends life of your clothes 4x longer.\*

## Faster Cycle Times Conserve Energy

Average Cycle time is 45 minutes vs. 90+ minutes for domestic models.

## Reduced Chlorine Bleach Consumption

Requires no bleach or caustic chemicals for disinfection. Chlorine bleach damages fibers, making them brittle. The Miele way of cleaning extends the life of the textiles and is better for the environment.

## Unique Fin Design

This keeps water levels low. The Little Giant uses about 14 gallons of water per load; a top loading machine uses 40 gallons of water. If you do five loads a day, you would save 47,450 gallons of water per year using a Little Giant. Lower water equals less detergent consumption.

## Highest Extraction Available

A high G-force spin (526 G's) significantly reduces moisture in garments and reduces drying time and energy costs.

## Residual Moisture Sensors in Dryer

Residual moisture sensors measure resistance to determine when the load is dry. Once it's dry, the dryer advances to the cool down mode and the heating stops. This feature significantly saves time and energy. It is also better for your garments.

## Flow Meter

Allows precision monitoring and control of water intake. When combined with the integrated pressure sensor, this contributes up to 10% reduction in water consumption.

\*An independent study conducted by WfK Applied Laundry Research Institute in Krefeld, Germany showed garments washed in the Honeycomb™ Drum to be cleaner and last up to four times longer than garments washed in a traditional drum.

# Exceptionally Engineered

## Freely Programmable

All programs are freely programmable, allowing the modification of wash temperatures, spin speeds, and starting times to pamper your exact laundry requirements. For even greater personalization, Miele offers unique Application Packages, featuring highly specific and extensively developed cleaning programs.

## Autoclean Dispenser

A specially coated surface and powerful jets of water enable the detergent to be flushed out of both main wash and pre-wash compartments without leaving any residue.

## Large Filter

The dryer's large lint filter, easily accessible in the front of the dryer, requires very little maintenance. In fact, depending on the type of fabric being dried, this filter is capable of collecting lint from up to 16 drying cycles – making the Little Giant an ideal choice for businesses.

## Commercial Reliability

The Miele Professional Little Giant is constructed of high grade stainless steel with a bearing designed for 25,000 operating hours.

## Low Vibration, Highest G-Force

Cast iron counter weights lower vibration to accommodate high speed extraction – an astounding 1400 rpms and a G-force of 526 G's occurs during extraction. This reduces drying times and extends the life of the garment.

## Frequency Controls

The washer's powerful asynchronous motor with a frequency – controlled drive system enables gentle starts and excellent machine life.

## Residual Moisture Controlled Dryer

Residual Moisture Programs utilize highly accurate sensors to dry items to the percent moisture value selected by the user. Reduced drying times translate into longer garment life and less energy costs.

## Temperature Hold

The Little Giant can reach a high temperature of 200° F, but more importantly, because of its powerful heater elements, it can hold temperatures for a set time to effectively disinfect.

## Honeycomb Drum™

A Miele exclusive, the Honeycomb drum™ provides superior garment care while enhancing overall cleaning.

## User-Friendly Controls

The Little Giant offers 13 pre-installed wash programs for common commercial applications. These programs are easily selected through the dial and button controls, following clear directions shown on the digital LCD screen in one of 21 selectable languages.

For added convenience, the controller features four function keys, which you can set to your most commonly used programs.

# Where Can You Use a Little Giant

The Little Giants innovative programming, compact design and high temperature capabilities – which can melt oils, lotions and chemicals – make this system a unique solution for a variety of applications. With a unique space efficient design and superior cleaning capabilities, these systems can be used in the main laundry room of a home, or on a yacht, or the back end of a day spa. In fact, the Little Giants save space, time and money in just about any environment, including:

- Pet Grooming Facility
- Veterinarian Center
- Dental Office
- Doctor's Office / Medical Center
- Bed & Breakfast or Inn
- Gym
- Restaurant / Café
- Hair Salon
- Estate Home

*Bed & Breakfast or Inn*

*Hair Salons*

*Laundry Room*

*Spas*

*Estate Home*

*Vet / Pet Grooming*

*Restaurant / Café*

# Machine Specifications

PW 6065 Washer

Evaporation Rate	–	3.4 fl oz / minute

\* Please note washer is available in 208V and 240V. Dryer is only available in 208V. Please call technical service for more information.

# Miele Professional Products

## Commercial Capacity, Speed and Performance

### About Miele

Miele is the world's largest family owned and operated appliance company, which was founded in 1899 in Gutersloh, Germany on a single promise of Forever Better. Today, Miele is represented in more than 100 countries around the world. and its commitment to conserving natural resources has lead to numerous awards and commendations. All Miele production plants are DIN EN ISO 14001.

### Miele Professional

The commercial products division of Miele leads the way in the development of innovative technology and meets the highest demands in washing, dishwashing, cleaning and disinfection in commercial applications. Providing true commercial cleaning systems with outstanding speed, capacity and performance, our laundry and dishwasher products are showcased in fine estates, yachts hotels and restaurants all over the world.

### Rotary Irons

You can reduce a 15-20 minute tablecloth or sheet pressing project to just two minutes with a commercial rotary iron. Miele offers four models to accommodate a variety of throughput needs for commercial hospitality laundry operations.

### Large Laundry Systems

Miele offers high extraction washers and dryers with exceptional programmability and high temperature disinfection. Models range from 23 to 70 pounds and specialized wet cleaning systems are also available.

### Commercial Dishwashers

Miele's freshwater commercial dishwashers provide a fast efficient solution for bed and breakfasts, commercial and community kitchens -- offering fast cycle times of 10 - 30 minutes. Miele offers an NSF/ANSI 3 approved model, and now an integrated option.
